**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Fillion et al.

Fillion et al disclose a body (28) made of insulating material (crosshatch) having a cavity with an inner side and an aperture (Fig 6), a semiconductor element (20) provided with contact (24), conductive connection pieces (inherent) with contact surface (32), electrically insulating material (18), components (22).

***Allowable Subject Matter***

Claims 4, 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-14 are allowed.

The following is an examiner's statement of reasons for allowance:

The limitation “ a thermally conductive layer situated on the inner side of the cavity” of claim 4, “removing the sacrificial layer from the cover in combination with other
